

Piranha ES ES-82-04Kx0

Enhanced Sensitivity Line Scan Cameras

Overview

4k resolution, 15x greater responsivity than traditional line scan cameras, 110 kHz line rate

The Piranha ES camera family represents our latest generation of enhanced sensitivity, TDI based cameras. With a maximum line rate of 110 kHz and throughput up to 640 MHz, the Piranha ES ES-82-04Kx0 provides the fastest speed available in a TDI camera. Camera alignment is also made easier with the selectable area mode of operation.

Camera configuration is extremely flexible and the number of Camera Link taps, throughput, and line rate are all software controllable.

The camera is capable of bidirectionality with up to 16 stages of selectability, while preventing overexposure with antiblooming.
